# *Médias et violence contre la violence ?*

- **1. La violence en elle même et sa représentation médiatique s'inscrivent dans la complexité dont aucun discours "simplificateur" ne pourra rendre compte.**
- **2. Les médias atteignent (ou vont atteindre) la fin du cycle de banalisation de la violence.**
- **3. L'"éducation médiatique" constituerait la contribution majeure et peut-être décisive des médias dans le vieux combat pour l'émancipation et l'élévation du genre humain.**
